

## What's New

### Improvements (See User Guide page # for more information)

- Ability to set a Preferred Contact Time for monitorees reporting via Emailed Weblink (Page 106)
- Added “HoH” badge on dashboard to indicate monitorees who serve as a Head of Household (Page 67)
- On import the system will now automatically calculate monitoree’s age if date of birth provided

### Usability and Performance

- Disabled pause/resume notifications button on records on the closed line list or records of active household members who are not Heads of Households. This is not a functionality change but improves clarity of current system behavior.
- Improved sorting of End of Monitoring date column. Dates are sorted first followed by “Continuous Exposure” (Page 20-21)
- Ability to filter record history by “Record Edits” (changes made to data elements included under “Monitoree Details”)
- Improved handling of the Lab Result field data during import

### Fixes

- Fixed sorting bug for “Eligible for Purge After” column on the Closed line list
- Minor updates to error messages displayed if an error is encountered during enrollment
- Increased validation of numeric fields (like Assigned User) on enrollment to prevent errors
- Sara Alert email logo used in email fixed so always appears with white background
- Various performance and code improvements

## User Documentation Updates – [saraalert.org](https://saraalert.org)

### User Guides

- **Guide for All Users**
  - Updated documentation on Last Date of Exposure and Continuous Exposure
  - Clarified Pause Notification logic and new tooltips found in the user interface
  - Updated API section
  - Minor language updates
- **Guide for Enrollers** – minor updates
- **Guide for Administrators**
  - Updated API section
  - Minor language updates

### Quick Start Guides

- Updated Quick Start Guide scenarios related to the Pause/Resume Notifications functionality.
- Minor updates to all other guides

### Data Dictionary

- Further defined the updated relationship between Last Date of Exposure and Continuous Exposure in the Data Dictionary
- Minor language and formatting updates
