

## What's New Improvements

- Monitreee details section of record reacts better to different screen sizes. This will improve the user experience on smaller screen sizes.

### Usability and Performance

- User role changes captured in Administrator Audit Log now match display of user roles on the admin dashboard (previously, underscores were included between words).

### Fixes

- Changing jurisdiction to the same value will not be recorded as transfer in history and exports.
- Fixed issue where deleting the first advanced filter would autofill a second blank filter with deleted criteria.

## User Documentation Updates User Guides

- Minor updates only.

### Quick Start Guides

- Reformatted the “Enroller” Quick Start guide to make the document more scannable by users.

## API Overall Improvements

- Improved support for foreign addresses
- See full [API Release Notes](#) for more details.

## Announcements

- Release 1.24 is scheduled for deployment to production on March 9.
- Production releases will continue to occur at 10 PM ET to better accommodate jurisdictions in time zones further west.
