

### Use the History section to track contact attempts and monitree record changes.

All contact attempts and changes made to a monitree's record, whether they are made by a user or by the system, are documented in the History section at the bottom of the monitree's record.

Users can filter the history section by "Creator" (i.e., username or Sara Alert System) or "Type" (i.e., type of change or action). Users can select multiple values in each filter from the drop-down.

The table below provides common scenarios for using the History section:
